

HAND OUT FOR CARCRAFT MINECRAFT WORLD- Activity 1

An Internal Combustion Engine (ICE) is a _____ engine where the combustion of a _____ occurs with an oxidizer (usually air) in a _____ that is an integral part of the working fluid flow circuit. In an internal combustion engine, the expansion of the high-temperature and high-pressure _____ produced by combustion apply direct _____ to some component of the engine.

The force is applied typically to _____. This force moves the component over a distance, transforming _____ into useful _____.

Options:

- [A] Heat
- [B] Combustion Chamber
- [C] Gasses
- [D] Chemical Energy
- [E] Fuel
- [F] Force
- [G] Pistons
- [H] Mechanical Energy
