CARCRAFT

A Minecraft simulation game for car mechanics

Project:
2020-1-UK01-KA226-VET-094527

Carcraft is an **innovative aproach to VET education** born after experiencing the effects that the **COVID pandemic** lockdowns had in education.

WAIT, WHAT IS CARCRAFT?

It's an **educational simulation game** based on the Education edition of **Minecraft** where **automotive mechanic students** will overcome challenges proposed by the game and their teacher.

SO, IF I'M A VET STUDENT...

You'll have to identify problems, build your own top-notch square-car and prevent every and all possible disasters gaining both **theoretical and practical knowledge for your studies while playing!**

AND IF I'M A VET TEACHER...

Let Carcraft turn your classroom into an **interactive joyful experience** taking advantage of our innovative digital tools. **Engage the students** and help them put theory into practice, even virtually through a gaming experience.

We have prepared **lesson plans** and a **game manual** to help and guide you.

OUR GOAL

To develop a high-performing **digital education** ecosystem by creating digitally competent and confident teachers and education and training staff offering:

High-quality learning content

User-friendly tools and platforms that respect the most strict privacy and ethical standards.

We seek to modernize VET education proposing **alternative and creative solutions.**

WHO IS IT FOR?

Carcraft is a tool for eveyone in the VET sector:

Students

Teachers

Educators
